Homework Assignment Number Zero

Problem 1.
LinkedIn account.
(a) If you don't already have an account on LinkedIn, create an account at https://www.linkedin.com/
Include at least a photo, your school affiliation and major.
(b) Sign up to follow the MSE department at https://www.linkedin.com/company/materials-science-and-engineering-at-the-university-of-tennessee/
(c) If you aren't already connected to me, send a connection request to David Keffer at https://www.linkedin.com/in/david-keffer-4a651627/
(d) Send a connection request to at least four others professors at UTK.
(e) Send me a LinkedIn message telling me that you are so excited to be in MSE 301 this semester or another flattering message of your own choice.

Problem 2.
Software Platform
(a) Please indicate whether you are going to complete your work in Matlab or Python.
(b) If you are going to use Matlab, download and install Matlab on your PC. Do not use a remote version.
The installation page is located at
https://webapps.utk.edu/OIT/SoftwareDistribution/Home/Menu/0/
If you already have Matlab on your computer, make sure that your license is up to date.
If you are going to use Python, download and install Spyder from https://www.spyder-ide.org/download or an equivalent Python environment.

Completing this homework counts for one Continuing Education Experience for MSE 301. Ask Dr. Keffer to sign your form.
